

# ACLS HEB

As of August 1, 2018, Humanities E-Book (HEB) is live on Fulcrum. To view the collection, visit [fulcrum.org/heb](https://fulcrum.org/heb). Please contact [acslsheb-info@umich.edu](mailto:acslsheb-info@umich.edu) with any issues.

## Access and Browser Requirements

Books may be accessed directly from links in the MARC records that have been loaded into the catalog of a subscribing institution. These records contain stable URLs that represent the most reliable way to reach the material at our site. If a subscribing institution has an access system that requires that URLs be rewritten, such as for proxy service, statistics tabulation, etc., that institution will need to make those local modifications to the URLs as system access requires.

If you experience any browser compatibility issues, you may want to try downloading an updated browser from one of the following sites:

- [Mozilla Firefox](#)
- [Chrome](#)
- [Edge](#)
- [Safari](#)

## OpenURL Compliance

HEB is OpenURL compliant on the title level, but not on the chapter and page level. In order to offer the most stable link to an individual title, you may use the title-specific handle, which can be found in the book's catalog record, and the format for which matches the following example:

<http://hdl.handle.net/2027/heb.01234.0001.001>

You may also use the Citable Link on the title record page of each book at <https://fulcrum.org/heb>, located beneath the Subject. The format matches this example:

<https://hdl.handle.net/2027/fulcrum.kk91fm144>

The Citable Link may be used to link to a title in the HEB collection on syllabi and course packs or on learning management systems such as Blackboard, Moodle, Canvas and D2L.

## ADA Compliance and Accessibility

ACLS Humanities E-Book is live on the Fulcrum platform as of August 1, 2018. From <https://fulcrum.org/accessibility>

:

*The Fulcrum platform aims to meet [WCAG 2.1 AA Standards](#) in both the platform and its content by providing infrastructure and resources to support accessible books, image descriptions, transcripts for audio, captions for video, and alternative formats for digitized content.*

*The extent to which Fulcrum meets WCAG 2.0 and Section 508 of the U.S. Rehabilitation Act is reported in Fulcrum's [Voluntary Product Accessibility Template \(VPAT®\) Version 2.3 INT](#).*

If you have any further questions, please email [subscriptions@hebook.org](mailto:subscriptions@hebook.org).

## Printing and Downloading

Since most material on this site is licensed for online electronic distribution only, this means that users are restricted to printing a chapter or chapters for personal research use. If, as an instructor, you want to use material in a course, you can provide the Citable Link permanent URL on the title record page. If you want to photocopy a chapter for your course, you must apply directly to the original publisher or copyright holder for permission. If in doubt, or for further information, see our section on fair use.

To download a chapter, go to the chapter/section headings listed under the "Table of Contents" tab. The "Read" button will take you into the e-reader; clicking on the "Download" button generates a PDF of the chapter.

Do not distribute the download link — HEB titles can be accessed by subscribers in a variety of ways, which impacts the URL generated.

A chapter may be downloaded or printed at a time. This is generally sufficient for following a citation or extracting a quotation and follows HEB's policy for fair-use rights and limitations.

**Please note, HEB's XML titles on Fulcrum currently do not support chapter downloads.**

HEB also offers a subset of titles from its collection for purchase separately as [print-on-demand](#) or handheld editions.

## MARC Records

MARC records are available free to subscribers and can be downloaded from [a public folder on Box](#).

PLEASE NOTE: The records are MARC21, USMARC records, in Unicode UTF-8 format. There is a discrepancy between the number of records and the number of books in the collection due to the fact that multi-volume sets share a single record. Every effort has been made to bring these records up to current national standards.

#### Fixed Fields:

- Record Type: a – Language material
- BLvl: d – Subunit of a collection
- 001 System-supplied control number
- 005 Date and time of latest transaction
- 006 Form of material: m – Computer file Type of computer file: m – Combination
- 007 Record characteristics for remote access computer file format for textual data

#### Variable Fields:

- 035 A unique identifier of the record
- 040 MiU |c MiU (University of Michigan NUC symbol)
- 090 LC call number derived from the original print version
- 260 Record publisher information pertinent to the original print source
- 300 Physical description for the original print source
- 533 Reproduction note on the processing of the page-image version – or
- 534 Original version note for text-based items
- 6XX Relevant LCSH assignments
- 7XX Additional access points
- 830 Uniform title series added entry
- 856 URL for Electronic access

MARC records are provided “as is.” Some options for MARC editing tools can be found on the Library of Congress’s website: <http://www.loc.gov/marc/marctools.html>. One free program, MarcEdit, can be downloaded here: <http://marcedit.reeset.net/downloads>.

Subscribers may share the HEB bibliographic records and metadata with third-party, not-for-profit databases as well as other service developers and providers working to make this data more broadly accessible as long as the records are not being resold by any party.

Records for all HEB titles, complete with OCLC IDs, are also disseminated via [WorldCat](#), and are available as a separate WorldCat Collection set.

## Titles/MARC Records Removed

Since HEB went live in September 2002, 161 titles have been removed from the collection. Libraries can download a list of those titles (including removal dates) [here](#).

WILL BE UPDATED SOON

## Usage Statistics (Stats)

Institutional subscribers can access their stats for our new platform, Fulcrum, at [https://fulcrum.org/counter\\_reports](https://fulcrum.org/counter_reports). This requires no login; it uses IP authentication to identify the requesting institution. You may need to alter the previous link to a proxied URL in order to be IP-authenticated to the reporting system.

Stats have been recorded on Fulcrum since our migration on August 1, 2018. You can still access stats from before July 31, 2018 at <https://quod.lib.umich.edu/cgi/s/stats/subscriber> (choose ACLS Humanities E-Book (acls) in scrolling menu).

HEB stats are [COUNTER 5](#) compliant. The COUNTER 5 standard is markedly different from COUNTER 4. The biggest difference comes in the way the reports count the number of hits. Your stats look different because the new COUNTER 5 standard shows use in a very different way and Fulcrum provides readers with a more modern way of reading which doesn't rely on individual page views in a page turner.

**IMPORTANT:** Several reports are available, but for details on title usage HEB subscribers should draw on the Title Master Report with the total item requests metric. For general platform usage, subscribers should draw on the Platform Master Report using the total item investigations metric. For details on chapter downloads, subscribers should draw on the Item Master Report using the total item requests metric.

**\*We strongly encourage you to consult the resources below for more information:**

[The Friendly Guide to Release 5 for Librarians](#)

[Glossary of COUNTER terms](#)

[COUNTER website](#)

[Quick Reference COUNTER 5 guide](#)

---

NOTE: HEB tracks usage through IP access only. Consequently HEB does not track off-site institutional access through ATHENS or SHIBBOLETH. Athens and Shibboleth users need to combine the results of HEB stats with those stats for an accurate picture of usage.

NOTE: HEB also does not track off-campus password access for secondary schools that do not use a proxy server. Consequently, depending on how HEB is accessed at those schools, stats for HEB may seem unexpectedly low.

## Proxy Server Configuration

If your campus uses a proxy server, it generally needs to be configured with the host names and/or domains of our servers. Please note, since the DLXS platform will remain live until December 2018, librarians should keep the DLXS proxy stanza in place until notified otherwise. Questions? Email [subscriptions@hebook.org](mailto:subscriptions@hebook.org).

As of August 1, 2018 these are:

### New Fulcrum Configurations

```
T Fulcrum
U https://www.fulcrum.org/
HJ doi.org
HJ https://doi.org
HJ hdl.handle.net
HJ https://hdl.handle.net/
HJ www.humanitiesebook.org
HJ https://www.humanitiesebook.org
HJ humanitiesebook.org
HJ https://humanitiesebook.org
HJ www.fulcrum.org
HJ https://www.fulcrum.org
HJ fulcrum.org
HJ https://fulcrum.org/
DJ fulcrum.org
```

```
Find id="permalink" aria-label="citable link" value="https://
Replace id="permalink" aria-label="citable link" value="https://^A
```

However, there are circumstances in which you may want to add a more nuanced configuration.

If you're currently using RedirectSafe or NeverProxy for [handle.net](http://hdl.handle.net), then add the following near the top of your config file:

```
AnonymousURL +https://hdl.handle.net/*
AnonymousURL +http://hdl.handle.net/*
AnonymousURL +https://handle.net/*
AnonymousURL +http://handle.net/*
```

... and add this line to the end of the Fulcrum stanza:

```
AnonymousURL -*
```

Similarly, the following lines should be added near the top of your config file instead of using RedirectSafe or NeverProxy for [doi.org](http://dx.doi.org) or [dx.doi.org](http://dx.doi.org):

```
AnonymousURL +https://dx.doi.org/*
AnonymousURL +http://dx.doi.org/*
AnonymousURL +https://doi.org/*
AnonymousURL +http://doi.org/*
```

This would also require the presence of the following line to the end of the Fulcrum stanza:

```
AnonymousURL -*
```

For the proxy service to take effect, users at your campus or institution need to access the service via a connection through the proxy server, not directly. Your proxy server administrator can provide you with a proper URL for linking to our service; ensure that your users are entering via that URL.

Please note that throttle settings in your configuration may have a negative impact on your members' use of large files on Fulcrum.

## IP Address Updates

If you would like to add an IP address to your authorized range (or remove one), please send us your update request by contacting [subscriptions@hebook.org](mailto:subscriptions@hebook.org), and the data will be forwarded to our technical support team. We will send a confirmation when the update has been made. Please note there is no separate log-in allowing subscribers to independently enter updates.

The University of Michigan campus backbone, on which Fulcrum is hosted, does not support IPv6 at this time. Please continue to send us your IPv4 ranges for basic authentication.

## Common Access Problems

If you are unable to resolve a Handle URL from our MARC records (e.g. <https://hdl.handle.net/2027/heb.05823>), you will need to add the domain 'hdl.handle.net' to your firewall's allowlist.

## Shibboleth / OpenAthens / SSO

Fulcrum supports access for your institution's members through federated Single Sign-On technologies such as Shibboleth or OpenAthens. Fulcrum is a member of InCommon and participates in eduGAIN. Allowing your members to access ACLS HEB via your Shibboleth / OpenAthens Identity Provider requires the following:

1. Your institution must have a SAML-based Identity Provider (IdP) whose metadata we can consume via a stable URL and which defines a security domain using shibMD:scope. This is most commonly achieved through membership to [an identity federation that participates in eduGAIN](#). The following federations have been confirmed to support access to Fulcrum via eduGAIN as of November 2019:
  - Canadian Access Federation (CAF)
  - HEAnet / Edugate
  - InCommon
  - UK Federation
2. Your Identity Provider must be configured to release attribute '*eduPersonScopedAffiliation*' to entityId '*https://fulcrum.org/sp*'.
3. You must provide us with the entityId of your Identity Provider.

Please note that Fulcrum **is not a member of OpenAthens Federation**. You must participate in another identity federation to take advantage of SSO integration.

## Privacy and Data Collection

The University of Michigan Library, which hosts the HEB collection, may collect some data about your institution's use of HEB in order to improve services and to integrate with university teaching and learning initiatives. It is committed to protecting the privacy and confidentiality of user data in compliance with federal and state laws and professional standards. Follow this link to read the university's [Library Privacy Statement](#), which governs Michigan Publishing's hosting of HEB.
